6. ACCIDENTAL RELEASE MEASURES	
Small Spill	For dry powder spills, inert materials such as sand may be added to control dusting prior to cleanup. Industrial grade vacuum sweepers are also recommended. Place spilled material into appropriate waste containers for disposal.
Large Spill	Contain spilled material immediately with an inert substance such as sand or Earth. Use plastic or aluminum shovel to transfer diluted waste material into appropriate containers for disposal. Airborne organic pigment dust may be an explosion hazard. Secure possible sources of ignition and avoid dusting.

7. HANDLING AND STORAGE	
Handling	Avoid employee exposure through the use of appropriate engineering controls and good industrial hygiene practices.
Storage	Store in a moderately cool, dry, well-ventilated area away from direct sources of heat. Empty containers may contain product residues and should be handled appropriately. Position containers so that any labelling information is visible.
8. EXPOSURE CONTROLS/PERSONAL PROTECTION	
Engineering Controls	The use of local exhaust ventilation is recommended.
Personal Protection	NIOSH approved dust respirators are recommended when handling in areas of pigment dusting. Safety glasses are also recommended. Impervious clothing should be worn when gross contact is likely, such as when cleaning up spills of large amounts.
Exposure Limits	There are no ACGIH TLV's or OSHA PEL's established for this product. The OSHA PEL for nuisance dust is 15 mg/m ³ (total dust), and 5 mg/m ³ (respirable dust) recommended. The recommended ACGIH TLV for nuisance dust is 10 mg/m ³ .
General Safety & hygiene measures	Handle in accordance with good industrial hygiene & safety practice. Due to the coloring Properties of the product closed work clothes should be used, to avoid stains during manipulation.

10. STABILITY AND REACTIVITY	
GENERAL	This product is a stable compound and hazardous polymerization will not occur.
INCOMPATIBILITY	Avoid strong oxidizing agents such as peroxides, chlorates, perchlorates, nitrates, and permanganates. Oxidizing materials may vigorously evolve oxygen in large amounts.
HAZARDOUS DECOMPOSITION PRODUCTS:	When involved in a fire, burning organic pigments may evolve noxious gases, which are toxic. These compounds may include carbon monoxide, carbon dioxide, nitrous oxides, or hydrogen chloride, depending on the pigment type. Phthalo Blue pigments may thermally decompose in polymeric resin applications when processed at temperatures exceeding 200°C(392°F).
11. TOXICOLOGICAL INFORMATION	
GENERAL	Based upon industry-wide experience over many years of manufacturing and published toxicological studies, organic pigments in general are considered to be practically non-toxic. This low order of toxicity is probably due to the fact that pigments are somewhat inert and insoluble substances.
ACUTE (SHORT-TERM) TOXICITY	This product has a reported acute oral LD50 value of 5 gm/kg or greater in rats.
CHRONIC (LONG-TERM) TOXICITY	No known published data available.
MUTAGENICITY	No known published data available.
12. ECOLOGICAL INFORMATION	
This product has not been evaluated for its ecotoxicity. However, the Biodegradation of organic colorants under aerobic conditions is expected to be poor and there is no evidence to suggest they create any significant ecological problems when released into the environment. Since organic pigments are generally insoluble compounds, they are believed to have minimal bioaccumulation and bio-availability characteristics.	
13. DISPOSAL CONSIDERATIONS	
General	This product must be disposed of in accordance with all applicable federal, state and local regulations.
Waste Management	Incineration or land filling are recommended disposal techniques. Contact the state or local environmental agency for specific rules. This product is not identified as a RCRA hazardous waste under 40 CFR 261, and is not regulated under CERCLA (Superfund).
